

Take advantage of a **FREE** assessment to evaluate your company's readiness to exploit bio-based materials or processes...at one of our clinics across the UK where we will provide advice on your readiness to market and identify and exploit new business opportunities!

Wednesday 25 July, Wilton Centre, Redcar
Book a 60 minute free session now!

Is your company ready for the next generation of *Bio-based products?

- ✓ Are you are start up company or SME?
- ✓ Are you working in the chemical or bio-based sector?
- ✓ Are you aware of bio-sourced materials and the value to your company?
- ✓ Are you looking to innovate?

What are* bio-based products?

Bio-based products are made from renewable biomass such as plants, trees, algae and waste. They are typically sold on into market sectors such as: Bio-plastics, Bio-lubricants, Bio-surfactants, Enzymes and Pharmaceuticals

What are the benefits?

- Assist with the shift from petrochemical to sustainable supply chain
- Can reduced costs in production processes
- Improved quality and performance in existing and future products
- Increased implementation of clean technologies therefore compliance with future regulations
- Don't miss the chance to give your company the competitive edge it deserves for the future

Is this event for me?

If you are a start up or established SME considering entering the bio-based products market and wishing to innovate we can help you.

Meet our Representatives for a 60 minute assessment where we will

- undertake a **free assessment** to understand your organisation's current and potential up-take of bio-based products
- Identify opportunities bio-based products can bring
- provide an overview of your business needs and how we can help you
- provide introduction to Life Cycle Analysis tool
- give access to business planning tools
- find partners and suppliers
- identify sources of private and public funding and subsequent review of project proposal
